DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4, 6, 8-22, 24-27, 29 and 43-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graham in view of Smith 6,296,155.

Graham shows a tilt valve (column 4, lines 15-33). Graham lacks first and second inlet apertures. Smith shows first 50 and second 52 inlet apertures so a user can select different flow rates (see abstract). It would have been obvious to one of ordinary skill in the art to have modified the Graham tilt valve with first and second inlet apertures as taught by Smith so a user can select different flow rates.

Neither Graham nor Smith disclose what the contained product is. It is well known that cosmetic products are dispensed using aerosols. It would have been obvious to one of ordinary skill in the art to have modified the Graham/Smith device with the contained product being a cosmetic because it is well know that aerosols dispense cosmetics.

Response to Arguments

Applicant's arguments with respect to claims 1-4, 6, 8-22, 24-27, 29 and 43-54 have been considered but are moot in view of the new ground(s) of rejection.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Graham shows a tilt valve. Smith teaches two openings. The Graham/Smith device is a tilt device with two openings in as much as applicant claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHILIPPE S. DERAKSHANI whose telephone number is 571-272-4925. The examiner can normally be reached on 8 hour days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
